★ BASED ON THE COMMUNITY FEEDBACK: "I loved the main storyline of Elden Ring. There are dungeons that can be challenging, and even more so if you're stuck on certain clues and don't have a map. Once you've gotten past the main story, however, the game is all about the side quests. The developers seemed to put a lot of effort into making sure there were tons of side quests to be had if you just spend enough time in the world. And while the story is fantastic, the side quests and the overall experience of Elden Ring are what really made it for me. You can level up to the max, get all the gear, and take on as many side quests as you want, but all those things are just all about finding your own satisfaction. There's no "ending" to the game, so there's no way to feel like you have to progress and get to the next chapter in some way. Also, it's very simple to complete quests. Especially the simple ones. They're not all that difficult, and you can clear them very quickly. The hardest part is deciding which to finish off first. There's no order to the quests, so it doesn't matter which you finish. Take your time. It'll only take you a couple of hours to beat the game if you enjoy the side quests. The first time I finished Elden Ring, I was surprised there was actually a second quest set after the main storyline. I love RPGs, and I'm sure that with a little patience, all the side quests could be completed, but they're not the end goal. They're just a means to find your own satisfaction." "I played Elden Ring, and it was fun, to say the least. Not only is it a beautiful and unique world, but the gameplay is really fun and there's plenty to do when you get tired of sitting on a quest. There are tons of side quests to do too, and some of them have very specific demands or requests that you will often have to fulfill before you can complete that side quest. So as you can see, there's a lot to do within the game. If you're really into the setting and the story, then you might find the game to be a little empty. I mean, you can totally ignore the story and go out on the side quests, but I wouldn't say that all of the side quests are "worthwhile", because some of them are a bit simple bff6bb2d33

## **Elden Ring 2022**

The world of Faerûn is in chaos. Dragons have returned from the Elemental Plane of Fire, and the Order of the Flame bears the pall of despair. Elves war with humans, orcs clash with gnomes, and giants battle each other for the last scraps of food in the world. And in the midst of these desperate struggles, a war is coming between the two nations of the Elves and the Men. Familiar faces, including the Ranger's, will face their greatest challenge as they defend the survivors of Taldor from the Iron Throne. New faces will emerge, as the story unfolds: your party will be changed as the heroes you save take charge of events. Their newfound strength and capabilities will, of course, be limited by their experience, but even so, with new allies comes new hope. The conflict between the Elves and the Men is about to reach its climax, and only by commanding soldiers from the region's peoples will you be able to put an end to the war. However, victories cannot be taken for granted: the iron men of Taldor are marching on Neverwinter, and they will be joined by the forces of the Burning Legion if they succeed. In this limited edition of four full-color volumes, you'll receive the first four episodes: the first, second, and fourth volume are for you to read from anywhere, while the third is limited for you to play from your PS4 or PC, including your library in your PS4. It would be impossible for the players of Faerûn to recount the events of the last year without mentioning the death of King Erevis Dahl, the Elf king's heir. But as his rebellious daughter, a girl known as the Snow Witch, rides toward Neverwinter to claim the royal seat, she will inevitably cross paths with adventurers, wild beasts, and even monsters of the Forgotten Realms. The Snow Witch is the key to a mysterious prophecy. As she grows and progresses in power, she will come across the elves' realm of Eredane, where her origin lies. This area lies in a frozen landscape, where monsters and beasts of all kinds lie about. A knowledge the Snow Witch has from her father can prove invaluable to saving Faerûn. With the size of the game being on the same scale as Final Fantasy XIV, you can expect another challenge and much more to see in this fourth story.

Frequency, specificity and contralateral spread of experimentally induced trigeminal neuralgia after microvascular decompression in rabbits: a neurotological and histological study. Facial palsy accompanied by trigeminal neuralgia can result from vascular compression of the trigeminal nerve root entry zone (pontomesencephalic transition) by a vessel. Microvascular decompression (MVD) is currently the standard treatment. This study evaluated the effect of MVD on the frequency, specificity and contralateral spread of experimentally induced trigeminal neuralgia (TN) in a rabbit model. The experimental design was a prospective animal study with 16 rabbits. The animals were tested at baseline and at different intervals after the induction of TN using a blinded, two-phase investigation protocol: (i) investigation of the frequency and specificity of TN using high-grade digital subtraction angiography; and (ii) investigation of the contralateral spread of TN using MRI. A vascular loop was positioned around the root entry zone, and the pedicled vein was dissected and removed. The trigeminal nerve was electrically stimulated. The results obtained with digital subtraction angiography revealed a focal contact between the hyperemic changes in the peri-rhinal structures and the induced TN. No contralateral spread of TN was observed in rabbits which were pre-test positive. The induction of TN resulted in hyperemia in the peri-rhinal structures. Despite the relatively small sample size and a lack of histological correlation, the results indicate that MVD is able to eliminate experimentally induced TN in rabbits." Here's another that I can't remember who said but it sums up a lot of the issue, "Software is either written for people to use, or it is written for a computer to process." Let me give this a try, "That's bullshit!" If it's for people to use, it should be easy to use. If it's for a computer to process, it's a dumb computer. We're only human after all. This is really good advice for another person who was really fast to anger, "With the holidays coming up, start thinking about the things you want to give to your loved ones. A great gift is a thought that precedes an action." What a sentence!
